Profile

Dedicated and results-driven Flutter Developer with a robust background in Dart, manual testing and automation. Proven track record of delivering high-quality Flutter applications across diverse market sectors. Expert in state management solutions, notably Bloc and RiverPod, coupled with a passion for implementing the latest technologies. Committed to leveraging the best tools and techniques to enhance user experiences. Actively participates in early application conception and design, working closely with product owners and the design team to provide early estimates for project timelines.
