🪪 Profile

Flutter Developer with more than 1 year of experience developing and delivering high-quality Flutter Applications for different market sectors using Dart. Dart is a programming language designed for client development, such as for the web and mobile apps. It is developed by Google in 2011 and is inspired by other programming languages such as Java, JavaScript, C#, and is Strongly Typed. It can also be used to build server and desktop applications. It is an object-oriented, class-based, garbage-collected language with C-style syntax. Flutter has several state management solutins, most famously Bloc & Provider. Used alongside Flutter's in-house DevTools allowed for battery consumption improvements up to 20% and nearly 50% lower memory usage compared to Flutter's native state management solutions. Very interested in exploring, learning, and applying every new technology.

🚀 Projects

- **Nexus Gym App**
- -Platform for connecting Members and Trainers
- -Booking / Resheducling / Cancelling classes and sessions.
- -Payments & previous invoice details
- -Communations Page / Events / Waiting List
- **Certificate System App related to the government.**
- **PCR App**
- *-Booking of vacation sessions and issuance of travel certificates*
- **DMV Licensing App**

🎓 Education

BS of Geotechnical Engineering

2014 – 2019 | Cairo, Egypt

German University in Cairo
Graduation Grade: Very Good

💼 Professional Experience

Flutter Developer, Gamma Tech Solution

05/2022 – present | Cairo, Egypt

Working on pixel perfect Mobile Applications design and integrate APIs using Flutter:

🧠 Skills

Git	Flutter	Rest API
BLoC / Rx	Provider / Riverpod
JSON	Firebase	Node.js
Java (Educational)	SQL-NoSQL
Matlab (Educational)	DSA

🌐 Languages

English (C2) **Arabic** (C2)

German (B1)
